

**Dr Stephen N McAdam**  
**Programme Director, DNV Research**

**Personal Statistics**

Nationality : UK

**Language Capabilities**

Fluent : English

Good : Norwegian

**Professional Experience summary**

Stephen McAdam is currently director of the biorisk management program within the research department of DNV. Stephen has over 10 years of laboratory experience working with pathogens such as HIV and HCV where he developed practical knowledge of laboratory biosafety and biosecurity issues. An immunologist by training, Stephen has spent the last five years exploring systems-based approaches to management and risk assessment in areas where the principal hazard is a biological agent. Stephen is responsible for the development of methodologies and tools in this area with a special area on laboratories environments and food.
